

# Business Creation in the UK: March 2021\*

We analyse the UK company register, provided by Companies House, up to February 28th, 2021. Company registrations are an indicator of firm creation and economic activity. New company registration remains strong throughout the third lockdown. However, there is a change in the type of companies registered. There are particularly strong increases in online retail businesses, food and drink, sports equipment production and pet care.

We find that

- Firm creation increased 8% from January 2021 to February 2021.
- Firm creation increased 22.3% from February 2020 to February 2021.
- The largest number of registrations occur in the 'Retail sale via mail order houses or via Internet' sector.
